

Group 4

Team Member:

- Chau Minh Truong
- Jonathan Ivanov
- Vishaliny Sriragunathan

Software Used:

- Management Board: [Trello](#)
- Text Editor: Visual Studio Code + Git Bash
- Version Control: [GitHub](#)
- Communication: WhatsApp
- Flowchart Drawing Tool: [Miro](#)

Task 1:

Work Distribution: Chau Minh wrote the script and drew the flowchart while Vish and Jonathan reviewed and tested it. All three members collaborated on debugging and improving the script.

Task 2:

Work Distribution: Chau Minh wrote the script and drew the flowchart while Vish and Jonathan reviewed and tested it. All three members collaborated on debugging and improving the script.

Task 3:

Work Distribution: Chau Minh wrote the script and drew the flowchart while Vish and Jonathan reviewed and tested it. All three members collaborated on debugging and improving the script.

Final Program:

Work Distribution: Chau Minh wrote the script and drew the flowchart while Vish and Jonathan reviewed and tested it. All three members collaborated on debugging and improving the script.

Summary

Overall, we worked collaboratively on all tasks, with each member taking the lead on each task while the others reviewed and tested. We used GitHub for version control, allowing us to easily track changes and collaborate on the same codebase and Trello for tracking the progress. We also communicated regularly through WhatsApp and meeting in person at college to discuss progress and resolve any issues that arose.
